Subject: RE: Cost to States - 3 funding takes to provide context on

Dave, thank you for pulling this together.

Just to update you all, I spoke with Greg A. today about our interest/desire to have a high level conversation about this matter with the Governor's office and the affected agencies. Greg thought it was timely and was informing Dick of EPA's interest. Greg confirmed that Richard Whitman is the right person to contact in the Governor's office to propose such a meeting. Greg also recommended that in addition to DLCD, the meeting involve Katie Koba from Ag and Doug Decker from Forestry. I plan to call Richard Whitman tomorrow to propose the meeting and explain the purpose.

- 1) Attached above is a table of potential CZARA realted fund loss for States without an approved Coastal NPS Plan that was prepared by NOAA Counsel Stephanie Campbell in 2009. **THE DOLLAR AMOUNTS ARE NOT CORRECT FOR 319** but the table gives you a picture of why what we do in OR has national implications.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

[Dov's response] Yes, Stephanie's table [attached above] is wrong re EPA's grants, but what is right may be the subject of differing views.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

I leave it to all of you to think about which of these views is the most likely to succeed in court.

Info on cuts from Jenny's briefing paper:

Ex. 5 - Deliberative

In addition to supporting habitat/water quality issues with its CZMA funding, OR also carries out other key NOAA and administration priorities including ocean planning and climate change adaptation, both would likely be impacted by this cut
